

OXFORD GARDEN®

NETTE Lounge Seating

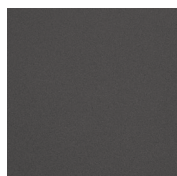

MATERIALS

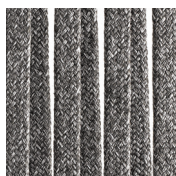

Powder-coated aluminum frame is durable and lightweight. Dual-layer structural straps are engineered for durability and to resist weathering. Composed of a soft outer polyolefin weave and supported by an internal polyethylene woven and bonded strap, this material provides both strength and comfort. Composite sling is PVC coated polyester thread woven into a mesh material. Quick Ship solution-dyed olefin is a soft, lightweight woven fabric designed for outdoor use. Its refined appearance makes it an ideal fabric for outdoor projects where you want a durable fabric that's still soft and chic.

Armchair seat is a reticulated foam pad upholstered in sling and integrated into the chair's frame.

*Cushions are included and available in Quick Ship fabrics shown below. Both seat and back cushions feature quick-dry construction with a waterproof bag encasing the foam and vented bottoms for drainage. Lumbar pillow (1LP-02SA) is optional, sold separately, and available in the Quick Ship fabric shown below.

Cushions and lumbar are also available in custom fabric or Customer's Own Material with a minimum order of two cushions. Pricing and lead times will vary, please call customer service at 877.866.3331 or email sales@oxfordgarden.com.
