Under no circumstances We shall not be liable for any and all fees, cost of installation/reinstallation/removal, subsequent damage or transportation in case of the product defect.

## TOOLS REQUIRED FOR INSTALLATION

Soft Cloth  
or Blanket

Silicone

Silicone/  
Caulk Gun

Tape  
Measure

Hammer

Safety Glass

Knife

Pencil/Marker

Phillips  
Screwdriver

Level

Putty Knife

Drill

Drill Bit

## STEP #1

Locate proper position for Pedestal. Make sure you have access to all plumbing and drain fittings. Also check door clearance or any other obstruction. Place Basin on Pedestal and move into desired position against wall. Making sure sink is level, mark with pencil the location of Basin support holes on the wall.

## STEP #2

Carefully remove Basin from Pedestal and install faucet and pop up assembly as per manufacturers instructions.

## STEP #5

If using toggle bolts, push them through the back-side of the Basin. Place rubber washer, steel washer and hex nut on end of bolt, in that order.

Next place Basin on Pedestal and move back into desired position on the wall while at the same time pushing toggle bolts through pre-drilled holes. If using Lag Screws, place washers accordingly and fasten sink Basin directly into stud.

## STEP #6

Tighten hex nut or toggle bolt until sink Basin is snug to wall.

1. Do not over tighten as this will damage sink.
2. The mounting lip is not designed to hold the weight of the Basin. Be sure Pedestal is supporting the Basin.

## STEP #8

Apply a bead of caulking between back of sink and wall. Also caulk where the Basin joins the Pedestal and finally at the base of the Pedestal.

Complete the final plumbing and drain assembly according to the manufacturers instructions.
