**Note:** 4" and 8" Deck Plates are available for other installations, see page one for information.

## 2 MOUNT CONTROL BOX; Fig. 2

1. Determine location of CONTROL BOX (1). It must be located with-in the 14" (356mm) by 21" (533mm) shaded area shown in **Figure 2** in order for electrical connections from the spout assembly to be made.

**NOTE: CONTROL BOX SUPPLY HOSE is 20". Distance between wall supply and CONTROL BOX (1) must be taken into consideration.**

2. Remove tape from CONTROL BOX COVER (2) and pull off COVER (2). Hold the CONTROL BOX (1) in desired location and mark the four mounting hole locations as shown.

**NOTE: Find plastic bag containing 4 M5X16 screws to be used for securing the CONTROL BOX COVER (1) when installation is complete.**

**NOTE: For AC installation, make power supply connection before mounting CONTROL BOX (1) to wall.**

3. It is recommended that the CONTROL BOX (1) be secured to a wall stud or cross brace within the wall using the SCREWS (3) supplied. If the CONTROL BOX (1) is to be installed on tile or plaster walls, the ANCHORS (4) and SCREWS (3) should be used.

# MAINTENANCE

## A HAND WASH SENSOR OPERATION; Fig. 1

When the Sensor detects a user, the water immediately starts to flow. Water flow will stop 2 seconds after user is out of sensor range. The off delay allows the user to comfortably move his hands without the flow cycling on and off. As a precaution, a safety timer will turn off the water, after the sensor has been blocked for 59 seconds. The water will stay off until the blockage is removed from the detection zone.

**Detection Zone: 2" - 10" (50mm - 250mm)**

**Default: Set at Factory 6" (150mm)**

## B CHANGE SENSOR RANGE; (Factory set at 6") Fig. 2, 2a

1. Remove cover from CONTROL BOX. Disconnect Power Supply (1), then reconnect. **Fig. 2.**
2. While the SENSOR CONTROL LED (2) is blinking slowly, place your hand 1 - 2 in. (30-50mm) in front of the sensor. **Fig. 2a.**
3. When the LED stops blinking and stays "ON", move your hand to the desired position and hold in place until the LED begins to blink again. **Fig. 2a.**
4. Once the SENSOR CONTROL LED (2) begins to blink again, remove your hand from the detection zone. When the flashing stops, the detection distance is set.
5. Replace CONTROL BOX COVERS (2). Tighten cover screws firmly.

## C CLEAN FILTER ASSEMBLY; Fig. 3

**CAUTION** Before opening CONTROL BOX disconnect AC power supply.

1. Remove CONTROL BOX COVER.
2. Close SUPPLY STOP (13) with 4mm Hex wrench.  
Note: Activate sensor to keep water flowing out of faucet while shutting off.
3. Unthread FILTER ASSEMBLY (6) using a 7/16" socket.
4. Pull out the FILTER ASSEMBLY (6), remove and clean white debris cup and filter screen.
5. Install the FILTER ASSEMBLY (6) back in its place and tighten with a 7/16" socket.

**Caution: Do not over tighten.**

6. Open SUPPLY STOP (13) with 4mm Hex wrench.
7. Replace CONTROL BOX COVER. Tighten cover screws firmly.

## D INSTALL / REPLACE THE BATTERY or LONG LIFE POWER PACK; Fig. 4

1. Remove COVER from CONTROL BOX (1).
2. Disconnect BATTERY HOLDER (3) from 27" EXTENSION CABLE (5).
3. Remove old BATTERY from BATTERY HOLDER (3). Install new BATTERY (2) making sure the terminal side is inserted first and shape of the battery follows the shape of the BATTERY HOLDER (3).
4. To replace LONG LIFE POWER PACK (4), unplug and replace with new Power Pack.
5. Reconnect BATTERY HOLDER (3) to 27" EXTENSION CABLE (5).
6. Replace CONTROL BOX COVER. Tighten cover screws firmly.

## E CLEAN AND REMOVE THE AERATOR; Fig. 5

1. Remove AERATOR HOUSING (1) with KEY supplied with faucet.
3. Remove AERATOR (2) from HOUSING (1).
2. Clean the AERATOR SCREENS (3).
4. Clean with water. Reassemble and install into spout end. Make sure black seal washer is in place.

## F GENERAL CLEANING; Fig. 6

1. For general cleaning use a damp, soft cloth to clean the spout and the sensor.
2. For cleaning dirt use a soft cloth with diluted dish washing detergent. Wipe the area using a wet cloth and dry using a soft cloth.

**CAUTION** Do not scratch the sensor when cleaning.

**Avoid using anything that may scratch the spout surface.** Never use polishing power, detergent or a nylon scrub brush. They will damage the surface of the spout or Sensor.

## FAQ'S

**Q:** How will I know if the battery needs to be replaced?

**A:** Valve will not open and sensor will continuously blink 2 times interrupted by a pause for up to 7 days.

**Q:** Why has the flow rate of the faucet reduced significantly?

**A:** The filter assembly, flow regulator or areator/spray may be clogged. Check and clean. Refer to Start-up/Maintenance, sections C, D and E.

**Q:** Why doesn't the water flow out of faucet when I'm within the sensor detection zone?

**A:** Battery may need replacement. Check. If sensor continuously blinks 2 times interrupted by pause, replace battery or call (844) CRT-TEAM / (844) 278-8326.

**Q:** What is the normal operating pressure range?

**A:** Faucet will operate with supply pressures ranging from 20-80 psi.
