### MATERIAL

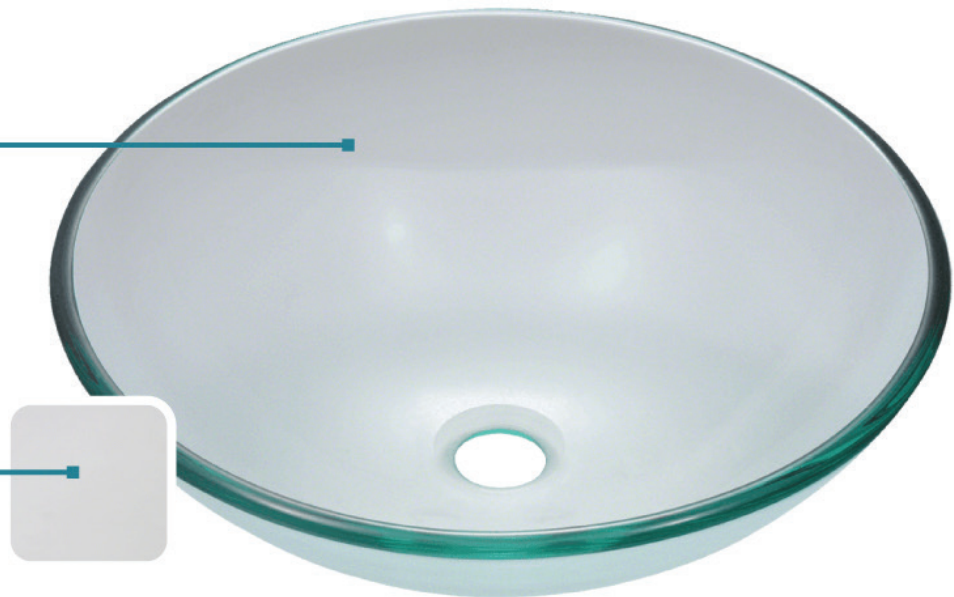

---  
We use only tempered glass for our vessel and undermount glass sinks, meaning the glass is processed by controlled thermal and chemical treatments to increase strength and durability. Tempered glass is safer because it crumbles into small granular chunks rather than jagged shards if the sink is ever damaged. Our glass sinks can handle very high temperatures and because glass is non-porous, it will not absorb odor or stains. This makes glass a very low maintenance and sanitary material choice for a sink.

## MATERIALS AND ACCESSORIES (cont...)

### Glass Sinks

Fully Tempered  
Glass

Non-Porous  
Surface

### ACCESSORIES INCLUDED WITH MR DIRECT ENSEMBLES ONLY

Waterfall Faucets

Vessel Faucets

Vessel Pop-Up
